## Question 1

0 out of 5 points

What structure of the biological neuron connects it to another neuron so that it can chemically interact with another neuron?

Selected Answer: The dendrites

Response Feedback: Review the slides or video.

## Question 2

4 out of 4 points

What structure of the biological neuron transmits an output signal over relatively long distances as compared to the size of the neuron?

Selected Answer: The axon

## Question 3

4 out of 4 points

Neurotransmitters are released by the synaptic buttons into the synaptic gap. Which of the following statements is the most accurate?

Selected Answer: Neurotransmitters are released from vesicles and bind to receptors on the dendrites.

## Question 4

4 out of 4 points

An electric charge builds up between inside and outside the cell membrane by virtue of the actions of

Selected Answer: the ion pump
