

Review Test Submission: Quiz 7.2

User	BRIAN THOMAS LOUGHRAN
Course	EN.605.647.81.SP21 Neural Networks
Test	Quiz 7.2
Started	3/10/21 7:32 PM
Submitted	3/10/21 7:34 PM
Due Date	3/16/21 11:59 PM
Status	Completed
Attempt Score	12 out of 15 points
Time Elapsed	1 minute
Instructions	Please complete this quiz after viewing Lectures 7.3 and 7.4.

Question 1

3 out of 3 points

In online training a neural network with multiple input/output pairs, each presentation of an input/output pair is followed by updating the weights before presentation of the next input/output pair.

Selected Answer: True

Response Feedback: Correct.

Question 2

3 out of 3 points

In batch training of a neural network, all input/output pairs are presented to the network, but the weight changes are used to update the weights after each input/output pair is presented to the network.

Selected Answer: False

Response Feedback: Correct.

Question 3

3 out of 3 points

In Receiver Operating Characteristics, false negatives have the characteristic that is sought to be detected.

Selected Answer: True

Response Feedback: You got it!

Question 4

3 out of 3 points

The sensitivity in Receiver Operating Characteristics is the conditional probability of a characteristic given that it has been detected.

Selected Answer: False

Response Feedback: Correct.

Question 5

0 out of 3 points

The specificity in Receiver Operating Characteristics is the conditional probability of an entity not having a characteristic given that it has not been detected.

Selected Answer: True

Response Feedback: Incorrect. Oops! You got it backwards. Review conditional probability and the slides.
