

# CRC Analysis

# CRC Card

Name	
Responsibilities	Collaborators

# Responsibilities

An object

- Knows things

- Can do things

# Collaborator

- Another object that is needed to help perform a responsibility

# Example

Product	
Knows price	Tax
Can compute tax	

# CRC Process

- Pick a system operation to model
- Choose the object that will receive the trigger message from the actor
- Repeat the following as long as there are responsibilities that need to be detailed
  - Choose a collaborating object
  - Negotiate the contract between the client object and the server object

# Hints

# Next

- An example of the CRC process
